MEMORANDUM FOR: Director/OSI

SUBJECT : JCAE Request for Information on Firms  
Supplying Nuclear Technology and Equipment  
to Communist China

1. The Directorate of Intelligence has been asked to assist OSI in responding to a request made by Senator Gore during the recent JCAE briefing. The request appears on page 93 of the Committee transcript, following your testimony on evasions of the COSCEN list.

2. I have consulted the D/ORA and the Legislative Counsel, who agree that OCR/FIB's raw list of companies suspected of dealing with Communist China would not be appropriate for passage to a Congressional Committee. I propose that the list to be supplied to Mr. Warner for the Committee be limited to the specific examples you cited plus such others as can be firmly identified from unquestionable and fairly non-sensitive sources. Mr. Warner concurs that no U.S. companies or direct affiliates should appear on the list; he is prepared to explain to the Committee the reasons for this exclusion. He may also suggest that the Department of Commerce and the Atomic Energy Commission are proper sources for such information.
